

# RADOSLAV CHOBANOV

Software Developer

✉ rado.chobanov97@gmail.com ☎ (+359)889037076 🔗 LinkedIn 🐙 Github

## PROFILE

I am a backend software engineer with several years of experience designing and maintaining scalable, microservice-based systems. I primarily work with Python, FastAPI, PostgreSQL, MongoDB, and Docker, building robust APIs, data pipelines, and automation tools. My work spans distributed architectures, IoT and industrial data integration, and self-hosted infrastructure on Linux-based systems, combining strong engineering discipline with practical, real-world problem solving.

## CORE SKILLS

Python

FastAPI

REST

API

PostgreSQL

MongoDB

Redis

Docker

Docker Compose

Docker Stack

CI/CD

Linux

Git

Gitlab

Github

## EDUCATION

**Bachelor of Engineering in Information Technology**

Technical University Of Sofia

09/2016 – 07/2020

Sofia, Bulgaria

## COURSES

**Telerik School Academy**

Telerik

10/2014 – 06/2015

Sofia, Bulgaria

**C++ Fundamentals**

Softuni

11/2018 – 04/2019

Sofia, Bulgaria

**Math Concepts for Developers**

Softuni

03/2023 – 06/2023

Sofia, Bulgaria

**Programming Basics with Python**

Softuni

04/2023 – 06/2023

Sofia, Bulgaria

**Data Science**

Softuni

06/2023 – 08/2023

Sofia, Bulgaria

## PROFESSIONAL EXPERIENCE

**Backend Software Engineer**

Evnisoft

09/2023 – Present

At Evnisoft, I work as a Backend Software Engineer, designing and developing scalable backend services and microservice-based systems using Python. My role involves building and maintaining APIs, integrating data from multiple sources, optimizing database interactions, and deploying services in containerized Linux environments. I actively contribute to system architecture, automation, and long-term platform stability.

**Unity Developer***Tritan Technology*04/2022 – 09/2023  
Sofia, Bulgaria

At Tritan Technology, I worked as a Unity Game Developer focusing on the end-to-end development of games using C#. I was responsible for building reusable game systems, integrating third-party tools, refining user interactions, and ensuring smooth performance across target platforms. The role emphasized structured code architecture, rapid iteration, and close collaboration with multidisciplinary teams.

**Game Developer***JPL Sofia*12/2020 – 11/2021  
Sofia, Bulgaria

At JPL, I worked as a Game Developer specializing in slot games built with the Godot Engine and C#. My role focused on implementing core game logic, probability-driven mechanics, and state management systems, as well as fine-tuning gameplay flow, resolving engine-specific issues, and ensuring consistent behavior across game rounds in a regulated production environment.

**Java Developer (Internship)***Versus Solutions*01/2020 – 07/2020  
Sofia, Bulgaria

During my internship at Versus Solutions, I worked as a Java Developer, contributing to the development and maintenance of an ERP system. I was involved in implementing backend functionalities, fixing defects, improving system stability, and supporting ongoing enhancements in a production-oriented enterprise environment.
